

Hi AP,

While Spring Break came earlier than expected, you all deserve some time off- so enjoy it! However, make sure you are also taking a little bit of time to focus on math. Over the break you should complete the following:

1.) Graphical Analysis Multiple Choice Review

- The yellow graphical analysis resource sheet is also uploaded for you to use as reference.

2.) Review the Two Chapters on Volume & Area:

- This is material that we have not learned yet, but that we need to know before the AP exam. Since we do not know when this break will end and when we will take the exam it is important that you are at least introduced to this material before we come back.
- There are step-by-step problems and practice sets so try your best

#1 is the priority (it will be graded). I can also assign additional practice for any topic you want through the college board classroom.

On a more serious note, there is a lot of uncertainty due to COVID-19. Please prioritize your health and your family's safety. Stay inside and away from large groups/crowded public places. You all are some my *absolute favorite people in the world-* so be safe!

If you or your family need ANYTHING don't hesitate to reach out.

Love you all SO MUCH.

♥ Ms. Dennis
